

WIRELESS ESTOP

Off-the-shelf systems
ready to ship today!

UP TO 7 OPERATOR READY REMOTES PER MACHINE

CHOICE OF THREE DIFFERENT TRANSMITTERS

POCKET-CLIP - Easy to hold wireless emergency stop switch that's vertically actuated and easily passable.

QUANTUM - larger belt-worn transmitter that's vertically actuated, and a horizontally actuated wireless kill switch.

MEGA - Glove-ready wireless E-Stop switch that's built for the harshest environments.

- All 3 are two-way radios in a mesh configuration that give you a real-time LED indication of machine status and radio link.
- 2 independent solid-state sourcing outputs rated for 5A each - one which is normally ON and turns OFF in an E-Stop condition.
- When the E-Stop switch is returned to neutral/safe, the remote is reset to an ON condition.

radios include:

- Intelligent power management
- EasySync RF teach
- Two-way communication
- Actively protected & monitored I/O
- Real-time feedback
- Active safety checking

FREQ
2.4 GHz DSSS

RANGE
600'
