

Real-Time Fleet Management at Your Fingertips

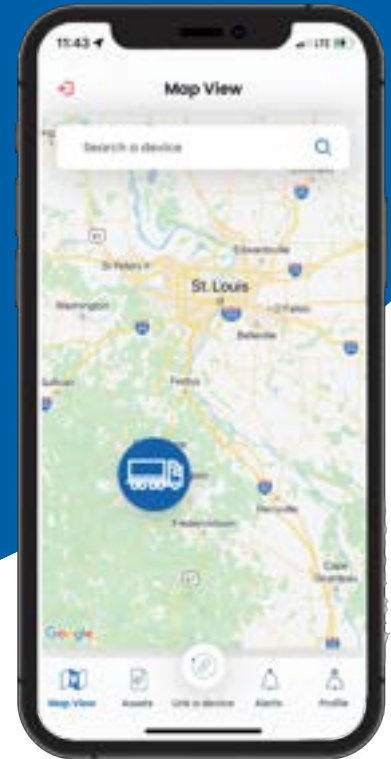

TRACMILE™ Connected Hubodometer

A Cloud-Connected Hubodometer with Self-Harvesting Power Technology and Cellular Communication

Manage Your Entire Fleet With One Simple Solution

The TRACMILE™ connected hubodometer provides you with asset logistics via phone or web app. Cloud-based software and self-harvesting power technology ensures you always have access to data in real time.

Customized alerts eliminate the hassle of tracking and capturing assets. The TRACMILE™ system streamlines your fleet maintenance program.

Fleet Tracking in Real-Time

- Access current location, maintenance schedules, tamper alerts and more!
- Monitor fleet habits such as speed and routing.
- Track stolen or misplaced assets and eliminate false mile logs with built-in security measures.
- Set alerts and customize for your needs.

Hassle-Free Installation and Maintenance

- Install in 3 easy steps:
 - Download the app
 - Scan the QR code
 - Configure asset details and you are ready to go!
- Skip the headache of installation, mount TRACMILE™ with a single bolt.
- Designed to withstand harsh environmental conditions (IP69K).
- Energy-harvesting feature ensures longevity and virtually ZERO maintenance.

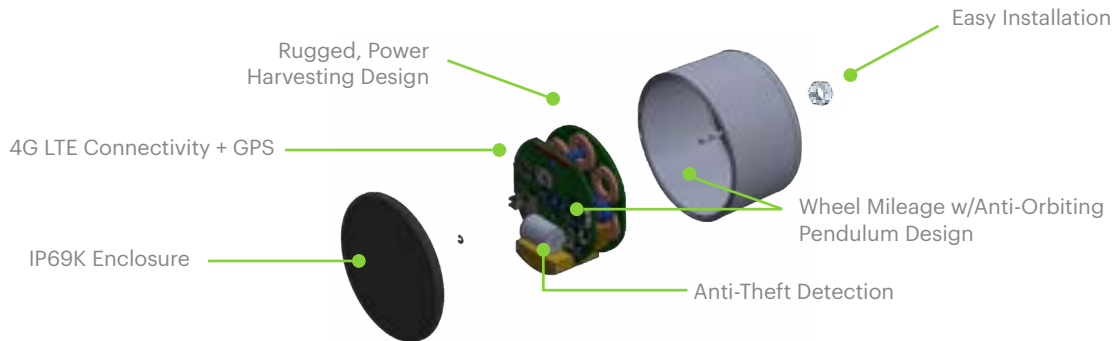

High-Performing Telematics for Less Than \$100/yr/device

- Rely on continuous operation with battery-less, self-harvesting technology.
- Access fleet data such as Map View, Asset Details, Trip History, Alerts, and more in one easy to use interface.
- Seamless connectivity on Americas most reliable 4G LTE cellular network. No Access Point required.

Advanced Features Provide Real-Time Fleet Monitoring

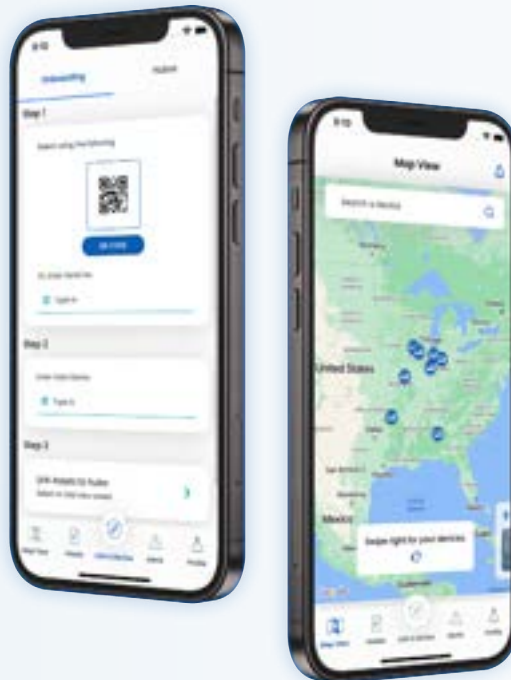

The TRACMILE™ solution boasts user-friendly software and other technology arming you with trailer-specific information in real-time.

AVAILABLE ON IOS/ANDROID AND ON YOUR DESKTOP VIA WEB APP

User-Friendly Interface For Easy Setup and Experience

Sync the TRACMILE™ hubodometer to the app by simply scanning the QR code on the product
