Process Meter
For a range of industrial applications

THREE YEAR 3 WARRANTY

Easy to Use. Easy to Read.

Programmable backlight **color to alert user**

UNDER CURRENT · OPTIMAL CURRENT · OVER CURRENT

Warning flash

0 to +/- 10V / 4-20mA / 10-50mA
User selectable Voltage & Current

40 segment curved bar graph display

Combined **digital and bar graph** display

0.1% Accuracy

Programmable **scale**

Programmable 4 digit star-burst display

Custom messages & annunciators

WIDE viewing angle

RPM 60 80 X10 40 20 374.5 0

NEW 10 alarm set points

USB port for custom user settings via the **free easy-to-use software**

PLC

Less than 53mm deep

2 outputs: Digital (open collector) or Analog (4-20mA)
NEW Digital Output Delays

user configurable linearization

INPUT

Full 4 digit readout for accuracy

Featuring an acclaimed easy-to-read display and a versatile set of inputs, the Process Meter takes the APM into a wide range of new industrial applications.
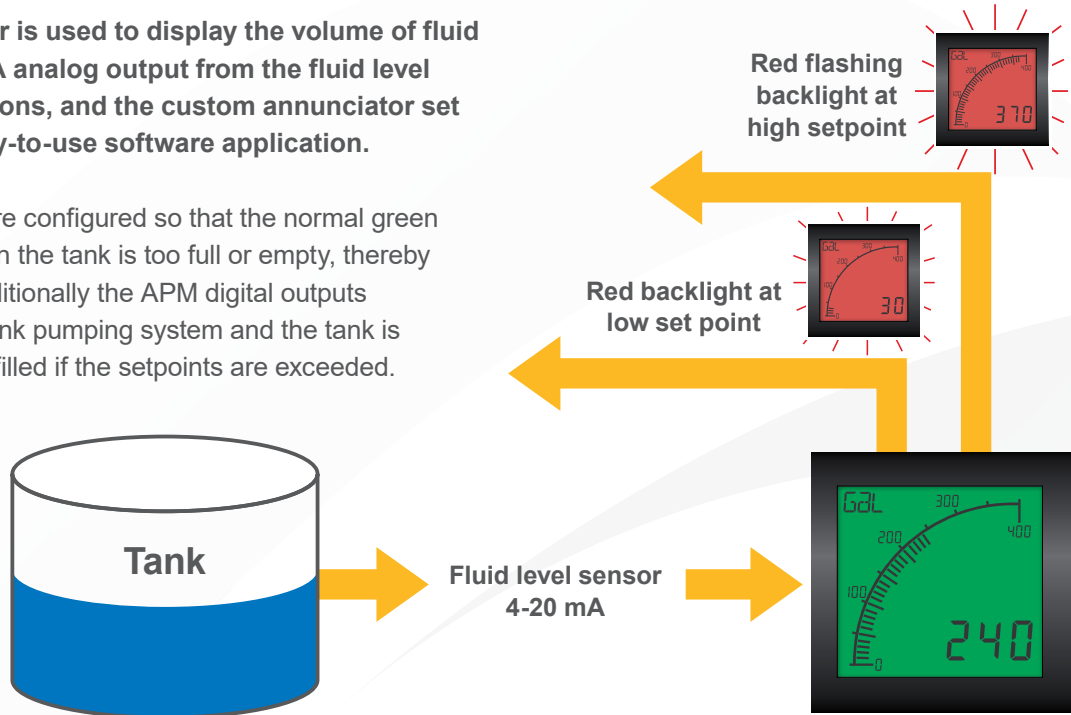

The programmable scale and custom annunciators mean users can tailor the meter to display their critical parameters exactly how they want, while the dynamic backlighting, in conjunction with setpoints, means operators are visually alerted when a parameter is out of range. The two outputs can be used to control other systems in the process, meaning the APM Process Meter is much more than just a display.

Trumeter's innovative technology brings a greater level of accuracy to the APM range through input signal optimization. By using this technology, accuracy of 0.1% or better is now achieved, allowing for more precise measurement, display and control. Non-linear sensors, such as thermocouples and pressure transducers, can also be used thanks to the new APM Configurator application that allows the user to configure upto 20 points in a non-linear conversion table.

Fluid Level Application

The APM Process Meter is used to display the volume of fluid in the tank. The 4-20mA analog output from the fluid level sensor is scaled to gallons, and the custom annunciator set to "Gal", all via the easy-to-use software application.

High and low setpoints are configured so that the normal green display will flash red when the tank is too full or empty, thereby alerting the operator. Additionally the APM digital outputs are integrated in to the tank pumping system and the tank is automatically drained or filled if the setpoints are exceeded.
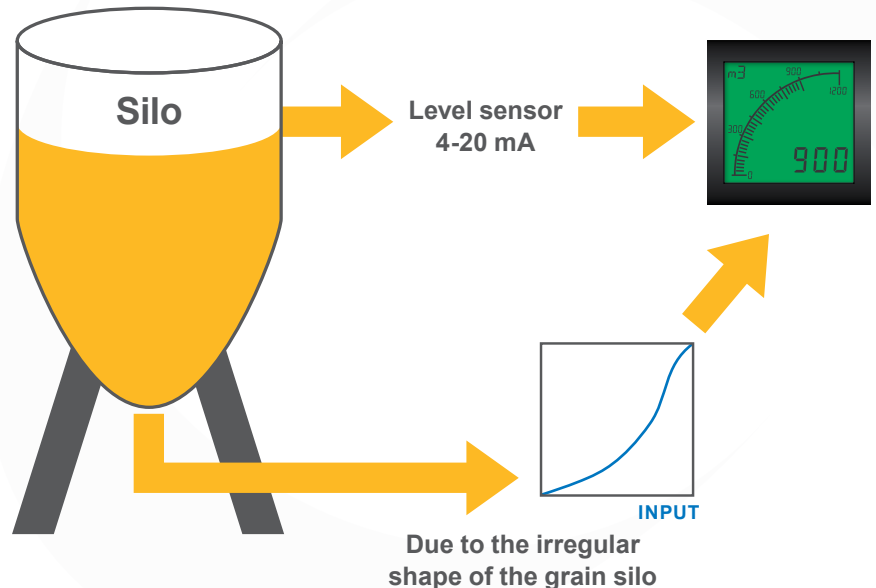

Red flashing backlight at high setpoint

Red backlight at low set point

Tank

Fluid level sensor 4-20 mA

Silo Volume Application

The APM Process Meter is used to display the volume of material in the silo, using the analog output from a level sensor.

The signal from the sensor is scaled to measure cubic meters, and the annunciator customised to m^3, all via the easy-to-use software. Due to the irregular shape of the silo, the 20-point linearization table is used to correct the non-linear signal from the sensor.

The displayed value accurately shows the volume in the silo. High or low setpoints can be set, and the APM can be integrated into other systems for process control.

Silo

Level sensor 4-20 mA

INPUT

Due to the irregular shape of the grain silo

Key Features

Large multi-format display that incorporates:

- 40 segment bar graph display
- Large 4-digit display
- Separate Starburst display area for annunciators, custom messages and alarm information
- Dynamic backlight color

Programmable:

- Scale (offset, gain and linear) and Range (min and max)
- Custom annunciators
- User-selectable backlight color and intensity
- *NEW* 20 point non-linearization scaling for non-linear sensors e.g. thermocouples and pressure transducers
- *NEW* Configurable digital output delays (control the time output stays open/closed - .5 seconds – 120 seconds)
- Two independent outputs
- 4-20mA analog retransmission output
Visibility:

- User-adjustable backlight brightness and color
- Large display
- Wide viewing angle (horizontal and vertical)
- Custom annunciators

Dimensions:

57mm [2.24"]   53mm [2.09"]   72mm [2.84"]   72mm [2.84"]

Panel cutout: 68mm x 68mm [2.68" x 2.68"] as per DIN43700/IEC61554

INPUT	VOLTAGE	CURRENT
Range (DC)	0 to +/-10VDC	0 - 50mA
Impedance	100KΩ	15Ω
Accuracy	0.1% of input or 5mV whichever is greater	0.01% of input or 5uA whichever is greater

ENVIRONMENTAL

Temperature - operating	-10 to +60°C
Temperature - storage	-40 to +70°C
IP rating (from the front)	NEMA 4 & 12 (UL 50) with IP65

POWER SUPPLY

Nominal Input (AC or DC)	12-24 VAC/VDC
Max Power	1.6W

DISPLAY

Number of digits	4
Digit height	12mm [0.47"]
Number of message characters	4
Message character height	6mm [0.236"]
Backlight colors	Red, Green, White
LCD display	Positive or Negative

OUTPUTS

Max voltage	34V
Max current	500mA
Analog output	4-20mA
CERTIFICATION	UL and cUL, CE, UKCA

Easy To Use Software

Just plug into any USB port on your PC, run the freely available APM Configurator application and you're off. No drivers required.

UL LISTED
Open-type Measuring and Testing Equipment
